

# Zero Touch Deployment

## The solution for a modern deployment experience

The way people work is changing. Teams need to be able to collaborate securely from anywhere, at any time.

**Enter Surface for Business:** a combined solution of hardware and software built to power the Modern Workplace. It offers a complete solution under a single, simplified monthly bill—and it's all enabled by Zero Touch Deployment.

## What is Zero Touch Deployment?

**You wanted an easy deployment experience, and we delivered.**

Thanks to a combined solution of Microsoft software and hardware, Surface devices are ready to go, right out of the box. No time-intensive device imaging. No large upfront costs. Just a simple, streamlined, and instantaneous experience.

**Zero Touch Deployment consists of the combined power of:**

- Devices, software, support, and accessories that are offered on a subscription basis, under one monthly bill
- A collection of technologies that enables IT departments to pre-configure, deploy, and secure devices with minimal infrastructure management
- A cloud-based directory that provides a centralized location for organizations to manage their IT infrastructure, user permissions and security settings
- A cloud suite that enrolls, secures and manages all devices across the organization
- Bundled cloud and software solutions including Microsoft Teams, a platform designed for collaboration that keeps teams' files and communications in a single, accessible location

## Benefits

Together, these five elements offer a modern, seamless combination of hardware and software. This is Microsoft's vision for a Modern Workplace where the technology is a conduit for great work—not an obstacle to it.

**Zero Touch Deployment** lowers the total cost of device and software ownership, so businesses can save their budgets for innovation. Employees can work smarter, not harder, to achieve better outputs.

The monetary savings are just as compelling. Depending on your company's size, Surface for Business and Microsoft 365 can save organizations \$943K in reduced security breaches, \$687K in device and application provisioning savings, and \$151K in reduced help desk calls over three years.\*

But Zero Touch Deployment doesn't just save time and labor: it enables effortless collaboration, security, and mobility. In short, it delivers the Modern Workplace, straight out of the box.

### ESTIMATED SAVINGS INCLUDE

**2.5 hrs**

deploying applications  
per device

**15% less**

time spent configuring  
each device

**+\$1M**

in savings over  
three years
